FORTUNA DWP

FORTUNA MODEL DWP Electronic Diamond wire cutting plant has been designed to facilitate the mining and dressing of blocks utilising the latest state of the art technology with perfect accuracy.

The machine is a model of modern techniques, efficient functioning and very economical. FORTUNA DWP has been made with the capacity to cut flush with the quarry face and also has the ability to cut on any level, vertical, inclined or horizontal.

Marble Granite & Stone Quarry Equipments

Features

- DWP consist of a three phase main electric motor that can swivel 360° for a complete coverage of cuts i.e. bottom cut, vertical cut and angular cut by controlling the rotation of diamond wire flywheel.
- A continuous electric drive unit powered by a D.C./A.C. electric motor allows the machine to advance along its rack forward & backward for cutting with variable speeds.
- Independent control panel.
- The flywheel can be provided as per speed of Diamond wire required
- Worm reduction gear with hand lever control to rotate the transmission group in 360°
- Special rack rails in 2 metre sections 3 pcs.
- We also supply Machines With 720 RPM/960RPM A.C. three Phase electric motor

Size	LENGTH	WIDTH	HEIGHT
DWP 30 HP	1160 mm	845 mm	830 mm
DWP 40 HP	2080 mm	900 mm	1180 mm
DWP 60 HP	2180 mm	1090 mm	1450 mm
